SERVICE AND REGULATORY ANNOUNCEMENTS.

MARCH, 1917.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc. concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION.

1917 CAMPAIGN AGAINST FLIES.

During the coming fly season a systematic and continuous warfare must be waged against flies at official establishments. Inspections to ascertain the prevalence of flies in various establishments made last summer showed better conditions than the previous year, but still much room for improvement. Establishment officials and bureau employees are requested to cooperate in order that inspections to be made this year may show effective fly control in inspected establishments. In preparation for this campaign a survey of the premises of official establishments should be made now, to provide for the removal and disposal of all fly-breeding material. Fly-fighting equipment such as screens, fly traps, fans, etc., should be promptly mobilized in order that the first flies may be captured. Inspectors and establishment officials who desire copies of Service and Regulatory Announcements of January and March, 1916, which describe how to construct fly traps and properly bait and maintain them should apply to the Chief of the Bureau of Animal Industry, Washington, D. C.

PROPER METHOD OF TAKING SAMPLES OF VEGETABLE AND ANIMAL OILS.

All samples of vegetable and animal oils to be submitted for laboratory examination should be either transferred directly into the sample bottle or taken from the original container by means of a glass pipette. Under no conditions should samples of this sort be drawn through a rubber tubing or allowed to come in contact with rubber in any way.

MEAT-INSPECTION FORMS AND STATION RECORDS.

The following instructions are given in addition to the tabular statement appearing on pages 34-35:

A new form, M. I. 124 BB, is being printed and a supply will be forwarded, when ready for distribution, to all stations where they can be used. This new form will take the place of M. I. Form 124 B for reporting bureau activities in all official establishments which do no slaughtering, the M. I. Form 124 B being used only for slaughtering establishments. The instructions in January Service and Regulatory Announcements for handling the M. I. 124 B will also cover the rendering and office record for the M. I. 124 BB.

Forms M. I. 113 A, 124 A, 124 B, and 124 BB need not be rendered for days when there is nothing to report.

Inasmuch as cysticercus carcasses placed in refrigeration, meats from carcasses and parts passed for sterilization which are to be handled in accordance with the provisions of section 3 of regulation 15, and pork products which are to be treated under bureau supervision for entering into food preparations which are commonly eaten uncooked, are under bureau control during such refrigeration or processing, it is necessary that memorandum or other records covering the handling of such meats and products be kept at establishments having any or all of these classes of work.

At stations having five or more establishments it is requested that the monthly reports be forwarded to the Washington office as follows: After copying arrange each group of forms, such as M. I. Forms 109, 110, 113, etc., in the numerical order of the establishments, without folding. When ready for mailing put them in a large manila envelope without folding, except such groups (not each separate report) as M. I. 110 and M. I. 130, as it may be necessary to fold to place in the envelope. At stations having less than five establishments fold each report before mailing, placing as many reports in each envelope as it will hold. No monthly report should be folded within another, except that the M. I. 113 reports may be folded within the M. I. 114 to which they pertain.

In forwarding the daily M. I. 112 series, the M. I. 112 D and M. I. 112 F should always be folded within the M. I. 112 to which they belong.

DISTRIBUTION OF NEW PUBLICATION ON FEDERAL MEAT-INSPECTION SERVICE.

An article entitled "The Meat-Inspection Service of the United States Department of Agriculture" is being issued as Separate 714 from the Department Yearbook for 1916. Copies of this pamphlet are being forwarded to the several meat-inspection stations in sufficient numbers to supply one for each of the employees at such stations. Inspectors in charge will please see that they are distributed accordingly.

Additional copies may be had, on regular station requisition, for distribution to persons outside of the service whose business or profession may be such as to make the article of interest to them. However, in order that the bureau's supply may be properly conserved, the requests for additional copies should not exceed such need. If the supply first ordered is found to be inadequate, requisition for an additional supply can be made.

TEXAS FEVER QUARANTINE—PLACES TO WHICH SOUTHERN CATTLE MAY BE SHIPPED FOR IMMEDIATE SLAUGHTER.

The following changes have been made in the list published in Service and Regulatory Announcements for December, 1916, of places to which southern cattle may be shipped for immediate slaughter under State and Federal permission:

Additions.

Florida, Jacksonville: Jacksonville Cattle Co.; Interstate Stock Yards Co. (Armour & Co.).

Illinois, Cairo: E. Bucher Packing Co.

Louisiana, Shreveport: Shreveport Packing Co.

Ohio, Cincinnati: The Cincinnati Abattoir Co.

Permission Withdrawn.

Indiana, Terre Haute: Home Packing Co.
Ohio, Cincinnati: The Union Stock Yards.

UNLOADING IMMUNIZED SWINE IN TRANSIT FOR FEED, WATER, AND REST.

Interstate shipments of immunized swine may be unloaded en route at a public stock yard for feed, water, and rest, provided that the destination named on the railroad billing is a point beyond the public stock yard and that the shipments are accompanied by a certificate issued by a competent veterinarian showing that the animals have been inoculated against hog cholera by the serum-alone method or the simultaneous method. When such shipments are unloaded at a public stock yard, the animals before being reloaded shall be disinfected under bureau supervision in compliance with disinfection requirements indicated in Regulation 6, B. A. I. Order 245. After disinfecting, the swine should be loaded in cleaned and disinfected cars or other vehicles. It should be understood that the foregoing instructions do not apply when in conflict with the requirements of the State at destination.

PUBLICATIONS IN MARCH.

[The bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to inspectors in charge for distribution to members of their forces. The number of copies varies with the subject or nature of the publication and the number and class of employees. For example, in the case of a publication on a veterinary subject, sufficient copies are sent for the veterinarians. Inspectors in charge will use their judgment and distribute publications to best advantage. Additional copies will be furnished on request so far as possible.]
